

Access management

Description

This training will help you to understand access management and what tasks are associated with it. How in your organization do you manage the arrival, the change of roles and the departure of an employee? What are you doing about password management, access to different systems? Are those are well protected against both internal and external threats? This training will help you to answer those questions.

Objectives

In this training, you will understand the implications of access management, the need to implement it and the process related to it. Upon completion of this training you will be able to:

- Understand basic concepts and apply them in your organization
- Identify and implement adequate access controls
- Put in place a process for Identity and Access Management
- Help you to convince your organization to invest in security

Content

This training will cover those topics:

- Definition of access management
- Basic concepts
- Types and categories of access controls
- Identity and access management

Practical cases will be used to help you to assimilate the different topics presented in this training and to implement those within your organization.

Audience

This training is intended primarily for someone who's working in access management or anyone else who is involved in.

Duration

A half day

This training can be customized to your organization to give you the best ROI.
