

Business continuity plan and disaster recovery plan

Description

This training will help you to understand what are a business continuity plan and a disaster recovery plan in the event of a disaster or a major security incident. The implementation of these plans requires that we can assess the risks, the points of no return and the resources required to minimize the impacts in such situation. A process must implement to manage those plans. Those plans must be tested on a regular basis, usually once a year. It is therefore important to be prepared adequately in order to minimize the impact on your organization and avoid, in some cases, its closure following a disaster or major incident.
