

Legal aspects of Information Security

Description

This training will help you to understand and identify the best security practices regarding legal aspects of Information Security. Information Security is framed by laws, both federal and provincial, that you should know. During a security incident, an internal audit, an investigation or an external audit, it is important to ensure that everything is done in accordance with the legal framework.

Objectives

In this training, you will identify the main laws associated to Information Security. Upon completion of this training you will be able to:

- Identify laws related to Information Security
- Know the main steps of incident management
- Understand the implications of a computer audit and a survey from the legal aspects
- Identify the main steps of an IT audit
- Help you to convince your organization to invest in Information security

Content

This training will cover the following topics:

- Laws and regulations
- Incident management
- Investigations and computer audits
- Conformity

Practical cases will be used to help you to assimilate the different topics presented in this training and to implement those within your organization.

Audience

This training is intended primarily for someone who's working in Information Security or anyone else who is involved in.

Duration

A half day

This training can be customized to your organization to give you the best ROI.
