

Awareness for users and managers

Description

This training will help you to understand and what security awareness for users and managers imply. You will see that the role of managers is essential in security awareness because managers must be a model to the employees. In first time, you must aware the managers to show the importance of Information Security. Without their implication, it is difficult to make aware of users. In this activity, you will see what you must put in place for security awareness to be a success and identify the main subjects that must be addressed.

Objectives

In this training, you will understand what security awareness implied in Information Security for users and managers, and what you need to put in place to achieve it. Upon completion of this training you will be able to:

- Understand the difference between training and awareness
- Identify roles and responsibilities for awareness
- Identify the elements constituting an awareness program
- Identify the main subjects to be covered
- Help you to convince your organization to invest in security awareness
